

CIO Leadership Programme

Strathmore University

@iLabAfrica Centre

Introduction

The CIO Leadership programme is designed for senior IT management personnel in local/regional companies who wish to enhance their knowledge and competence in IT Management. This programme brings together local and international expertise.

Through this programme, participants will learn how to integrate key management concepts and best practices to develop strategic thinking and leadership skills as well as have an integrated view of the business landscape. The course will also cover current trends in technology and their relevance to local businesses in a post-pandemic world.

Why

In the digital era, businesses have no choice but to digitally transform and adapt certain technology practices in order to survive and have a competitive edge. For companies, a digital business strategy is viewed as a means of transforming their business, streamlining their processes, and making use of technologies to enhance their interaction with customers and employees, and deliver excellent customer experience.

For enterprises to successfully adapt to digital transformation, they need leaders who are skilled and equipped to implement the right digital technologies and the right business models related to Information Technology.

For this reason, CIOs, CTOs and CSOs need a deep understanding of Information Technology in order to provide effective leadership for their organisations.

Programme Objectives

1. To provide participants with an IT leadership mindset.
2. To help participants formulate an ICT strategy and align it to the business strategy of their organisation.
3. To provide participants with knowledge on digital transformational skills to reinvent business models and create innovative products and services.

Application Requirements

- Updated CV
- Reference letter (from employer)
- 2 passport size photographs

Applications are accepted throughout the year and should be received no later than two months before the start date.

To get more details on the program start date and the cost implications, contact the Executive Education Department through email on @iLabee@strathmore.edu

Target Audience

1. Chief Information Officers (CIOs).
2. Chief Technology Officers (CTOs).
3. Chief Security Officers (CSOs).
4. Individuals in senior IT management who aspire to be promoted to any of the positions listed above in the near future.
5. Individuals in executive-level position in companies or other entities whose profession is focused on scientific and technological advancement within the organisation dealing with current ICT technologies.
6. Board Members who oversee IT functions in companies.
7. Chief Digital and Innovation Officer (CDIO).
8. Chief Digital Transformation Officer (CDTO).
9. Chief Data Officers (CDO).
10. Strategy and Innovation Officers.

Expected Learning Outcomes

1. Participants will cultivate an Information Technology leader mindset and will fully embrace and understand the role of an IT leader.
2. Participants will be able to formulate and align IT strategies that will be of great value to the organisation.
3. Participants will be able to reinvent business models and create innovative products and services through digital transformational skills.

Competitive Edge of this Programme

- Customised content that is targeted for the local industries of East Africa.
- International modules that adopt advanced technologies yet to be implemented in the local industries of East Africa.
- Course will incorporate different topics in Information Technology that will provide participants with relevant knowledge on digital transformation of organisations.
- @iLabAfrica has conducted market research through stakeholder meeting for CIOs.
- Networking with executives in strategic leadership positions who are industry experts with relevant knowledge on digital transformation, emerging trends of technologies and local and international information on the current digital era of technology.
- Business and Networking Opportunities.
